

Product Sheet

OKUMA LB-15II CNC Turning Center (1997)

Made in Japan

Machine Overview

The **OKUMA LB-15II** is a reliable CNC turning center built in **Japan**, designed for **stable and efficient machining**. Known for its **durability and accuracy**, it is suitable for a wide range of general turning applications.

Equipped with the **OSP-7000L control**, **10-inch chuck**, and **12-station turret**, the machine offers **easy operation** and **flexible machining capability**. With a maximum turning diameter of **340 mm** and length of **520 mm**, it is ideal for everyday production use.

This machine is a **practical and cost-effective choice** for customers seeking **dependable Japanese CNC equipment**.

Asking Price:

USD 16,200 (FOB Japan)

FOB price does not include:

- Inland transport in Japan
- Ocean freight
- Marine insurance

CIF quotation can be provided upon request depending on the destination port.

Payment Method

Bank transfer in USD is accepted.

We can receive USD payments via our international bank account (Wise).

For new customers, 100% advance payment is required.

Key Features

- ✓ **Reliable CNC turning center by OKUMA**, a globally trusted Japanese machine tool manufacturer
- ✓ **OSP-7000L control system** for easy operation and stable machining
- ✓ **10-inch hydraulic chuck with 12-station turret** for flexible machining operations
- ✓ **Spindle speed up to 4,500 rpm with 15/11 kW motor** for stable cutting performance
- ✓ **Maximum turning diameter Ø340 mm and turning length 520 mm** for a wide range of applications

◆ Competitive Advantage for Buyers

- ✓ **Reliable Japanese CNC turning center by OKUMA** for stable industrial machining
- ✓ **Stable machining performance** with OSP control and robust spindle design
- ✓ **Versatile machining capacity** suitable for a wide range of industrial components
- ✓ **Cost-effective solution** compared with purchasing a new CNC lathe
- ✓ **Ready for export from Japan** supporting international buyers and distributors

🔍 Why This Machine?

The OKUMA LB-15II is a **proven and reliable Japanese CNC lathe** that offers an excellent balance of **performance, durability, and cost-efficiency**. It is ideal for users who need a **dependable machine for daily production** without the high investment of newer models.

With its **easy-to-use control system** and **stable machining capability**, this machine is a practical solution for both experienced operators and new users entering CNC machining.

🔧 Machine Condition & Running Test

- The machine is stored in a factory in **Osaka, Japan**
- **Power-on and basic operation check completed**
- **Inspection and test run can be arranged upon request**
- Available for **export from Japan**
